EDUCATION

BS Information Technology
University of Mindanao Digos College
2022 - 2026

Senior High School (STEM)
Asian Institute of Technology Inc.
2020 - 2022

SKILLS

- Technical System Design & Architecture
- Product Strategy & "Product Sense"
- Security Compliance & Risk Auditing
- UI/UX Design & Prototyping
- Business Model Development
- AI Prompt Engineering & Orchestration

LANGUAGE

Tagalog

English

About Me

Frontend Specialist with expertise in TypeScript, Vue 3, and React. Specialized in building data-heavy enterprise dashboards and AI-integrated systems. Proven ability to architect resilient cloud-native infrastructures and optimize frontend performance for applications handling high-concurrency data streams.

EXPERIENCE (PROJECTS)

LUME CORE | Lead Infrastructure Engineer

Role: Lead Systems Architect

February 2026 – Present

- Architected a real-time Forensic AI Dashboard using Vue 3, TypeScript, and Tailwind CSS v4 to visualize complex security and scalability metrics.
- Implemented a multi agent AI pipeline using Gemini 3 flash, enabling autonomous auditing of live website DOMs and GitHub repositories.
- Developed high-density, filterable data tables and real-time SVG gauges, providing executive-level insights into technical debt and infrastructure health.
- Optimized data ingestion by building a "Direct-to-Cloud" pipeline (Cloudflare R2), supporting 2GB+ uploads with 0ms server-side lag.

IRIS-TS | Lead UI Engineer

2026

- Developed a Full-Stack TypeScript (Hono.js & Vue 3) generative design engine that synthesizes aesthetic tokens from visual inputs.
- Engineered a live-rendering IDE using iframe-injection and a custom design-token compiler, allowing for instant "Design-to-Production" workflows.
- Deployed via Vercel Edge with integrated Cloudflare security, ensuring sub-100m rendering speeds globally.
